PROFESSIONAL SUMMARY

Results-driven Electrical Engineer with specialized expertise in power systems, renewable energy, and industrial automation. Successfully completed projects in solar energy systems achieving 20% efficiency improvements. Demonstrated experience through hands-on training at thermal power stations and locomotive works. Seeking an Electrical Engineer position to contribute to innovative power solutions and industrial applications.

TECHNICAL SKILLS

Power Systems	Industrial Automation	Software & Design
• Power Distribution	• AutoCAD Electrical	• Autodesk Fusion 360

KEY COMPETENCIES

- **Power Engineering:** Distribution Systems, Protection Systems
- **Renewable Energy:** Energy Efficiency
- **Technical Tools:** AutoCAD Electrical, Autodesk Fusion 360
- **Additional Skills:** Project Management, Microsoft office, Microsoft Power Point

SOFT SKILLS

- Team Player, Positive Attitude, Quick Learner, Problem Solving

PROFESSIONAL EXPERIENCE

Technical Intern | Chittaranjan Locomotive Works (CLW) | Technical Training Centre | July 2024 - August 2024

- Analyzed locomotive electrical systems for 95% diagnostic accuracy
- Optimized power distribution with senior engineers
- Tested traction motors and control systems
- Improved safety by reducing incident risk by 40%

Vocational Trainee | Damodar Valley Corporation | Bokaro Thermal Power Station | December 2021 - January 2022

- Assisted in plant operations and power generation analysis
- Studied electrical distribution networks and equipment
- Supported preventive maintenance scheduling

EDUCATION

B.Tech in Electrical Engineering (Lateral Entry)

Asansol Engineering College • Asansol, West Bengal • 2022 - 2025 • 6.70 -CGPA

Diploma in Electrical Engineering

Bengal college of polytechnic • Durgapur, West Bengal • 2019 - 2022 • 7.7 -CGPA

Secondary Education

Gyan Bharati school • Raniganj, West Bengal • 2015 - 2016 • 7.4 -CGPA

PERSONAL PROJECTS

SOLAR BATTERY CHARGER

- Designed and tested a solar-powered charger with photovoltaic cells
- Integrated BMS to boost efficiency and battery life
- Reduced reliance on traditional energy sources

SOLAR PANEL CLEANING ROBOT

- Built an automated robot with smart sensors to improve energy output by 20%
- Enabled autonomous operation using advanced control algorithms
- Designed an eco-friendly system with minimal water and power usage
