SUMMARY

A Young Student who is pursuing B.Tech in Electronics and Communication Engineering and specialized in VLSI. Certified in Tessolve, Oracle and Google Cloud Platforms demonstrating a commitment to continuous learning and development. Adept in C++ and Python.

EDUCATION

B.Tech in Electronics and Communication Engineering , KL University Aziznagar, Hyderabad CGPA: 8/10	2021 - 2025
12th , Sri Chaitanya Junior College JNTU, Hyderabad CGPA: 8.5/10	2019 - 2021

INTERNSHIPS

- **Embedded Developer Virtual Internship**
- **Vlsi-Design And Verification Internship**
- **Ethical Hacking Internship**

CERTIFICATIONS

- **Tessolve Certified**
- **Oracle Certified Associate**
- **Automation Anywhere Certified**
- **AWS Academy Cloud Foundations**
- **AWS Academy Machine Learning Foundations**

PROJECTS

- *Gas Level Sensor with Alarm* *Arduino Uno*
 - Designed and implemented a gas level sensor system incorporating state-of-the-art sensor technology and alarm functionality. embedded firmware for gas level monitoring, utilizing microcontroller platforms such as Arduino Uno.
 - Created an interactive user interface featuring a search functionality with event listeners for both button clicks and implemented dynamic background updates based on current weather conditions.
- *Crop Disease Prediction and Management App* *HTML, CSS*
 - Employ image recognition and AI algorithms to identify crop diseases at their early stages, allowing for prompt action. Provide tailored recommendations for disease prevention and treatment based on specific crop types and disease diagnoses.
 - Serve as an educational platform, offering farmers valuable information on crop diseases, their symptoms, and effective management strategies.

SKILLS

- **Programming Skills:** C++, Java
- **Frontend:** HTML
- **Backend:** JavaScript
