SUMMARY

Recently Graduated Electronics and Communication Engineering | Ex-Intern at DRDO | Ex-Intern at HSL | **Present a paper in International Conference** | Working on AICTE Approved Projects (AI Wheelchair)| Skilled in programming, cybersecurity, and IoT architecture, with a proactive learning mindset and problem-solving approach.

PROJECTS

Security Analysis of IoT Ecosystem Using LLM

- Conducted security analysis of IoT ecosystem using Large Language Model to identify vulnerabilities & potential attack vectors.
- Explored cybersecurity threats like Mirai Botnet & Stuxnet, assessing their impact on IoT architecture and proposing mitigation strategy.
- Leveraged LLMs for threat detection and normally identification, enhancing security insights for IoT network and connected device.

GSM Enabled Car Theft Detection Smart System

- Built a dynamic and responsive user interface using GSM module with Arduino uno-R3 for better integration with smartphones.
- Applied advanced algorithm to develop high security, increasing user satisfaction by 25%.
- Using Neo-6M module owner get precise location of vehicle with the thief's photograph with the help of oV7672 cam module

AI Wheelchair

- Wheelchair which can be controlled by Brainwave, Hand Gesture and Joystick simultaneously.
- Arduino get signal via hand gesture & move accordingly.
- Applied advanced algorithm to develop high stability with easy to use.

EDUCATION

B Tech, Electronics & Communication Engineering

Oct 2021 - Jul 2025

J.C. Bose University of Science and Technology, YMCA (Formerly YMCA UST)

INTERNSHIP

SAG, DRDO

- Communication Security especially for wireless communication.
- Block chain Technology for legitimate CIA technology.
- IoT-architecture, communication technology & their Vulnerabilities.

High Street Lighting Pvt. Ltd.

- Work in research and development department on ongoing technology in street light.
- Enhanced documentation & Microsoft suits skills.

SKILLS

Programming Languages: C/C++, Python

Skills and Technologies: IoT-Architecture & Vulnerabilities, Communication Security, Ki-Cad
Microcontroller-Hardware integration with software, PLC.

Frameworks and Tools: Anaconda, Numpy, VS Code, Git, SCADA

Other Skills: Problem-solving, Documentation, Research-Work, Leadership.

CO-CURRICULAR ACTIVITIES

Mechnext- The Mechatronics Society

- Served as Executive-in-Charge of Electronics Department.
- Led various club tech projects, including teaching the juniors about Mechatronics.
- **Skills Developed:** Micro-controller Programming, Teaching, and PCB Designing.

Samarpan- The Techno-Philia

- Currently served as Secretary of the Club.
- Led various club event & documentation work
- **Skills Developed:** Leadership, Team Collaboration, Event Planning, Management, and Strategic Thinking.

Certificates

- Participated two times in the World-Robotics Challenge and received a certificate of participation.
- Completed the NVIDIA NIM Micro-Service workshop, obtaining a certificate of participation.
