ELECTRICAL AND ELECTRONICS ENTHUSIAST

A recent Electrical and Electronics Engineering graduate with a basic understanding of electrical circuits, electronic devices, and control systems. Eager to learn and grow in the engineering field. Looking for an entry-level opportunity where I can apply my academic knowledge and gain practical experience in electrical and electronics systems.

EDUCATION

Christ college of Engineering & Technology
B.Tech(Electrical and Electronics Engineering)
CGPA-7.82

2021-2025

Amala higher secondary School
Higher Secondary Certificate(HSC)-**74%**

2020-2021

PROFILE SUMMARY

- Sound knowledge of electrical engineering concepts, equipment & tools
- Strong analytical & problem solving skills
- Basic Knowledge of maintenance & electrical components wire connections
- Normal communication knowledge
- Proficient knowledge of transmission, broadcasting & switching
- Basic Knowledge of electrical safety.

PROJECT EXPERIENCE

DESIGN AND IMPLEMENTATION OF VERTICAL AXIS WIND TURBINE WITH INVERTER (final year)

Designed and developed a prototype Vertical Axis Wind Turbine (VAWT) system to harness wind energy efficiently in low-wind areas. Integrated the turbine with an inverter circuit to convert the generated DC power into AC for domestic or small-scale usage. The project involved mechanical design of the turbine blades, selection of appropriate generator, and implementation of a basic inverter system for stable output. Focused on sustainable energy generation and low-cost design.

ADDITIONAL INFORMATION

- Visited Industrial field to get industrial experience in Indira Gandhi Centre for Atomic Research [IGCAR], Kalpakkam, TamilNadu- Jan 2025.
- Participated in symposium at Christ College of Engineering & Technology to submit a Event. March 2023
- **Award: Academic Excellence**
