OBJECTIVE

"Motivated and detail-oriented electrical engineering graduate seeking an entry-level position to apply knowledge of circuit design, power systems, and embedded systems. Passionate about innovative solutions and eager to contribute to a dynamic engineering team."

EXPERIENCE

- 01/12/2023 - 01/01/2024*
 - In plant trainee**
Lenovo
- 01/05/2024 - 01/06/2024*
 - Trainee**
Neyveli lignite corporation
- 01/06/2023 - 01/07/2023*
 - Intern trainee**
Eaton power quality

EDUCATION

- 2025*
 - Electrical and electronics engineering/ bachelor of technology**
Puducherry technological University
7.6
- 2020*
 - Higher secondary**
Petit seminar higher secondary school
73%

SKILLS

Language: c,c++

Language: python

Framework: react.js

Flink

PROJECTS

- **Battery management system for electric vehicle with grid energy trading capabilities**
Designed the bms for energy trading in software and hardware
- **Voice controlled DC motor (mini project)**
A voice-controlled DC motor is a system that allows you to control the operation (start, stop, direction, or speed) of a DC motor using voice commands. It's a cool application of speech recognition combined with motor control circuits, and it's often used in automation, robotics, and assistive technologies.
