CAREER OBJECTIVE

As an Electronics and Communication Engineer with a strong background in Industrial Core and IT, I am eager to leverage my skills in the rapidly advancing field of both Core & IT fields. My technical expertise, paired with a creative and solution-oriented mindset, enables me to develop innovative solutions that drive real-world impact. I thrive in dynamic environments and am committed to continuous learning, ensuring I stay ahead of emerging technological trends.

TECHNICAL & SOFT SKILLS

- Arduino Programming
- Coupa & SAP Basics
- Proficient In E-Sim ,Xilinx Software Through Experience
- Strong Leadership
- Adept Project Management
- Innovative Thinking.
- Problem-Solving Skills

PROFESSIONAL EXPERIENCE

Hindustan Unilever Limited

March 2025 - Present

- As an Engineer Trainee, I have gained hands-on experience with tools like Coupa for procurement processes and a foundational understanding of SAP for managing inventory and financial data. I am skilled in handling and organizing operational data to support informed decision-making. My responsibilities also include raising permits and ensuring proper documentation for engineering activities. These experiences have helped me build a strong base in both technical and administrative functions, preparing me for broader challenges ahead

EDUCATION

Jawahar vidya nikethan (SSLC)	2018
Sri sampurna vidhyalyam hr.sec school (HSC)	2020
Ifet College of Engineering (ECE)	2024

INTERSHIPS & PROJECTS

- **UNIQ TECHNOLOGIES** - 2022 Embedded Systems internship: Utilized Proteus and Arduino IDE for design, implementation, and real-time project-based learning.
- **CODE BIND TECHNOLOGIES** - 2023 Acquired Python basics and delved into image-processing applications.
- Gained industrial exposure at **TRACO CABLE COMPANY LTD** in cable manufacturing, quality control, and safety standards; acquired hands-on experience at **CREATIVE SWITCH GEARS** in switchgear design, assembly, and performance testing.
- (2021) First- year Project "Automatic wind shield wiper system based on climate changes" , (2022) Second- year Project "IR based security system using Arduino" , (2023) Third- year Project " Secure wireless controller for hand held remote operation in peak hours in cities " , (2024) Final year project " photonic crystal fiber sensor for ammonium chloride detection using comsol software"

ADDITIONAL INFORMATION

- **Languages:** English, Tamil.
- **Certifications:** Certified In Internet of Things and Networking Fundamentals- Nptel. and Cyber security essential on IBM virtual internship.
- **Awards/Activities:** "Awarded first prizes for innovation at TALENTO 2K23 and design excellence at VALEDICTORY 2K23."
