1/123 Perumal Kovil Sreet
ondipulinayakanoor,
Sankaralingapuram post
virudhunagar district.

EDUCATION

University VOC
College of Engineering 2025
B.E-Electrical and
Electronics Engineering(80%)
2021-2025

SKILLS

Languages: Java, C, Python
Web Technologies: HTML, CSS
Databases: MySQL
Frameworks: Deep convolutional
Neural Network (DCNN), Hasing
Algorithm-SHA 256, CSV Algorithm,
Flask server algorithm, Blockchain
Algorithm.

LANGUAGE

English Tamil

ACHIVEMENTS

- Paper Presentation
- Participated in NSS Camp
- Sports-Hand Ball (State Level),
shotput (State level)

About Me

Secure a responsible career opportunity to fully utilize my training and skills, while making a significant contribution to the success of the company.

PROJECTS

Door locking system using 8051/C: A door locking system using 8051 microcontroller allows access control by verifying a password entered via a keypad. If the entered password matches the preset code, it activates a relay to unlock the door; otherwise, access is denied.

Heart diseases prediction using logistic regression/Python Heart disease prediction using logistic regression uses patient health data to estimate the probability of having heart disease. It outputs a binary result (disease or no disease) based on statistical relationships between input features.

Secured Face Recognition System using Blockchain Technology/Python & Machine Learning:

A Secured Face Recognition System using Blockchain Technology combines facial recognition with blockchain to ensure secure and tamper-proof identity verification. It stores encrypted facial data on a decentralized ledger, protecting it from unauthorized access or modification.

CERTIFICATIONS:

- 1.Python Stack
- 2.Front-end Development
- 3.JavaScript by Great Learning
- 4.Java
- 5.MS Excel
