Summary

An experienced and accomplished Electrical Engineer with a proven track record of success in operation & maintenance substations up to 33KV, project management & troubleshooting. Skilled in Electrical Power Distribution, Electrical Lighting, Electrical Control Systems, Power System Analysis, Protection and Coordination & Electrical Project Management. Proven ability to develop and execute electrical designs, manage projects from inception to completion, and troubleshoot complex electrical systems to ensure reliable and efficient operation. I am seeking a challenging role where I can leverage my expertise to make a significant contribution to the success of the organization.

Skills

Auto CAD

Electrical Project coordination

Electrical cost & estimation

Electrical renovation

LT Panel

MS Word

MS Excel

Solar plant installation testing & commissioning

Education

JNTU-GV

B.Tech - Electrical and Electronics Engineering, CGPA: 7.38

Apr 2023

Narayana educational institutes

Secondary Higher Education - MPC, CGPA: 10

May 2019

Narayana educational institutes

Secondary School, CGPA: 10

Apr 2017

Experience

CSIR CCMB

Electrical Shift Engineer

Sep 2023 | Hyderabad

- Operation and Maintenance of 33/0.433 kv substation, 2MVA Transformer, VCB's, Isolators, LA'S, HT/ LT PCC Panel's, ACB'S, SFU's, RTCC Panel's, APFC, AMF Panel's & Lab Electrical Distribution Systems.
- Operation and Maintenance of 4NO's 750 KVA Diesel Generator set's.
- Preparation of power & control Schematic Drawings, SLD's using AUTOCAD.
- Preparation of Specification, estimations & AUTOCAD drawings for new facilities / Projects and renovations.
- Coordinate projects including design, installation, testing, and commissioning of 150 kW solar plant and Modular Arc tested LT-PCC panels ensuring compliance with specifications and quality standards.
- Procurement of electrical components at competitive rates while ensuring compliance with project specifications and safety standards.
- Monitored and analysed energy consumption by comparing sub-meter, main meter, and utility meter readings with applicable tariffs

AP TRANSCO

Intern

Jun 2022 - Jul 2022 | Vizianagaram

- Studied various equipment's (Auto transformers, Battery chargers, Wave traps, Surge arrestors, Differential protection implementation etc. included in SLD.) and their operations in the 220KV/132KV/33KV substation

Accomplishments

- JEE MAINS PERCENTILE : 94.87
- AP EAMCET RANK : 7500

Projects

- **Installation, testing and commissioning of Modular arc tested LV Panel (01/2025 -present)** : 60kA / 0.3 sec LV panel with 4B form of separation, 1000 amps Micro processor based ACB's, E91E Aluminum busbars of 100x10mm, AMF function, HMI, multifunction meters with RS485, Micro processor based 400 Amps MCCB's, Metering CT's of 0.1 class, pre cable fault protection, Thermal monitoring, Energy management system above all as per confirming to IEC 63419 standards with latest amendments
- **Roof top solar plant grid connected solar plant installation, testing & commissioning (09/2024 - 03/2025)** : 150 KW Solar PV system with Mono-perc half cut model PV Panels, Grid connected inverters with 4 individual MPPT's with 2 strings for each MPPT & Grid islanding protection, Hot dip galvanized iron foundation structures, ACDB & DCDB.
- **Electrical renovation (01/2025 - present)** : Cost & estimation of the renovation including the enquiring quotation for competitive prices for rate analysis, Accounting of the electrical materials used, Billing of the services & material provided during the project & Drawing layout of the electrical system installed during the renovation for reference
- **Fuzzy based MPPT for solar & fuel cell based bidirectional electrical vehicle using PMSM drive (08/2022 - 03/2023)** : Simulation of hybrid electrical vehicle powerd by fuel cell and solar panel with fuzzy based MPPT controller.Also implemented regenarative braking using bidirectional converter in MATLAB simulink.
- **Wireless power transmission (08/2020 - 09/2020)** : A simple prototype of wireless power transmission cricuit has designed and executed output .
