Professional summary

- Performed routine maintenance on machines.
- Conducted daily inspections of machines, checking for wear and tear, unusual noises, and operational inconsistencies.
- Cleaned and lubricated key machine components.
- Hands On knowledge on mechanical, pneumatics hydraulics
- Hands-on experience in Mechanical Skills, Assembling, Conveyors, Gear Box, Shaft ,
- Conveyor Systems, Bearing, Pumps, Fits & tolerance.
- Troubleshoot mechanical, electrical, and software-related issues.
- Calibrated machine settings for machines.
- Replaced worn or damaged components.
- Maintained detailed maintenance logs.
- Ensured compliance with safety regulations.

Objective

Skilled Maintenance Technician with 8+ years in mechanical repair and servicing of heavy industrial equipment, including compressors, gearboxes, and hydraulic systems. Looking to join a reputable organization where I can apply my deep mechanical knowledge and proactive maintenance approach to reduce failures and increase equipment uptime.

Education

DIPLOMA IN MECHANICAL ENGINEERING

Passed out 2016

DHANALAKSHMI SRINIVASAN POLYTECHNIC COLLEGE-PERAMBALUR

Work Experience

Apprenticeship.

July 2016 – July 2017

Hyundai Motor India Limited, Chennai, India

- Supported the assembly of passenger vehicles on the production line, working with a team to install chassis components, powertrain systems, and interior modules.
- Interpreted technical diagrams and followed Standard Operating Procedures (SOPs) to ensure accurate and timely assembly of vehicle components.
- Operated pneumatic and electric tools to assemble parts safely and efficiently, meeting daily production targets.
- Collaborated with senior technicians to identify and fix assembly issues, contributing to continuous process improvements.
- Performed visual and functional inspections to maintain high-quality standards and adherence to ISO manufacturing guidelines.
- Participated in daily safety briefings and maintained a clean, hazard-free work environment in accordance with 5S methodology.
- Documented production activities and reported material shortages, tool malfunctions, and process delays to the line supervisor.
- Gained hands-on experience in automotive electrical wiring, fuel system setup, and final vehicle testing procedures.

Maintenance Technician

Oct 2017 – Feb 2020

Ever Secure Mechanical Contracting, Abu Dhabi, UAE.

- Performed routine preventive maintenance and emergency repairs on industrial valves, centrifugal pumps, gear pumps, and other rotating equipment.
- Diagnosed mechanical, hydraulic, and pneumatic issues using tools such as dial gauges, calipers, vibration analyzers, and pressure testing equipment.
- Conducted dismantling, inspection, cleaning, and reassembly of valves (gate, globe, ball, butterfly) and pump systems to restore functionality and ensure optimal performance.
- Maintained detailed maintenance records, including service logs, repair

history, and spare part replacements using computerized maintenance management systems.

- Assisted in overhauling and testing of control valves, pressure relief valves, and actuated systems.
- Monitored equipment performance and helped plan predictive maintenance schedules to reduce unplanned downtime.
- Supported installation and alignment of pumps and piping systems during plant upgrades and commissioning activities.
- Collaborated with the engineering team for continuous improvement projects to enhance equipment reliability and maintenance practices.
- Ensured availability of critical spare parts and coordinated with stores for timely procurement of required items.

Maintenance Technician

Sep 2021 – Present

Seahath canning company, Margoa, Goa

- Performed preventive, corrective, and breakdown maintenance on automatic and manual seamer machines to ensure continuous production with minimal downtime.
- Diagnosed mechanical, electrical, and pneumatic issues in seamer heads, tooling components, and drive systems using tools like multimeters, feeler gauges, and dial indicators.
- Carried out precision alignment, timing, and adjustment of seamer rolls and chucks to maintain sealing quality and prevent leakage or product damage.
- Replaced and calibrated worn-out parts such as rollers, bearings, cams, and seals according to OEM specifications and maintenance schedules.
- Executed changeovers and machine setups for different can sizes and formats as per production planning requirements.
- Conducted regular visual inspections and sample testing of sealed cans to verify double seam integrity and quality compliance.
- Documented maintenance activities and generated reports for downtime, root cause analysis, and recurring issues.
- Collaborated with production and quality teams to minimize machine-related rejects and improve machine efficiency.
- Provided training and technical support to junior maintenance staff on seamer operations and troubleshooting.
