

AHALYA SUNIL

Electrical Engineering Graduate

ABOUT ME

A motivated and detail-oriented Electrical Engineering graduate with robust expertise in electrical systems, circuit analysis, and power electronics. Highly adapt in engineering tools such as MATLAB and AutoCAD, with a proven record in applying academic knowledge to deliver innovative solutions. Recognized for analytical problem-solving ,swift learning and collaborative teamwork, seeking to contribute dynamic technical skills in a challenging engineering role. .

EDUCATION

RAJAGIRI SCHOOL OF ENGINEERING & TECHNOLOGY

BTech in Electrical & Electronics Engineering(2021-2025)
Percentage:66.06 %

KPMHSS POOTHOTA

Class 12(2019-2021)
Percentage : 96.25 %

ST LT GHSS ,Vaikom

Class 10,2019
Percentage : 98%

SKILLS

- Circuit Simulation & Analysis Power Electronics
- Matlab
- Autocad
- Leadership & Team Collaboration
- Communication & Presentation Project Experience

FINAL YEAR ENGINEERING PROJECT

APPLICATION OF DC-DC BUCK BOOST CONVERTER USING HYBRID PID FUZZY LOGIC CONTROLLER IN EV CHARGING

Designed and implemented a hybrid PID-Fuzzy Logic-controlled DC-DC Buck-Boost converter, optimizing energy efficiency for electric vehicle charging. Achieved higher dynamic response, stable output voltage and improved system reliability using fuzzy logic and PID algorithms. Integrated multiple charging modes, reducing energy loss by 15 % and enhancing battery longevity for smart EV charging infrastructure.

INTERNSHIP

KSEB 110KV SUBSTATION VAIKOM

Completed hands- on training in high-voltage substation operations, switchgear management and transformer maintenance. Assisted with real-time troubleshooting, load flow analysis, and circuit breakers maintenance. Developed practical understanding of power system protection, SCADA, and safety protocols.

ACHIEVEMENTS & LEADERSHIP

Led student teams in engineering competitions and class projects. Recognized for clear and effective technical presentations . Active member of electrical engineering clubs and workshops.
