

SHRUSHTI SANJEEV SHIGGAON

+91-7892860469 shiggaonshrushiti@gmail.com

PERSONAL DETAILS

Current Location Bengaluru
Date of birth May 19, 2003
Gender Female

EDUCATION

Graduation B.Tech/B.E. (Electronics And Communication Engineering)
Jain College of Engineering and Technology, Hubli with Score 8.3%
Achievements: Received scholarship, I played state level volleyball

Class XII Karnataka
with 70.02% in 2021
Achievements: All rounder

Class X Karnataka
with 72% in 2019

Certification Course Advanced Real Estate Valuation with Ensemble Regression Models: Accurate
Property Assessment Techniques (November 2024 - Present)
AI - Machine Learning Engineer (September 2024 - Present)

INTERSHIPS AND PROJECTS

Internships **IBM** (Duration November 2024 - April 2025)
6 months
Skills used - Machine Learning, Machine learning And Python Developer

Rooman Technologies (Duration November 2024 - February 2025)
Problem-solving mindset, ability to adapt when things don't go perfectly,
Improved ability to work in teams, manage tasks, and communicate technical
results, May work full-time or part-time depending on the program.
Communication skills: being able to ask questions, share progress, explain
issues A report or presentation at the end summarizing learnings and results.
Skills used - AI - Machine Learning Engineer

Projects **WIRELESS ELECTRIC VEHICLE CHARGING STATION USING RFID.** (Duration February 2025 - May 2025)
• Designed and implemented a wireless EV charging system integrated with
RFID-based user authentication for secure access. • Developed embedded
control logic for automatic charging initiation upon RFID tag verification. •
Utilized inductive power transfer techniques to enable efficient wireless energy
transmission. • Programmed microcontroller to interface with RFID reader and
manage charging operations. • Ensured system safety with real-time
monitoring and automatic shut-off upon charging completion.

Driver Anti Sleep Device (Duration July 2024 - September 2024)
• Implemented an efficient eye detection algorithm using computer vision
techniques to accurately monitor and detect eye closure in real-time. •
Designed and integrated a responsive buzzer system that activates immediately
upon detecting driver drowsiness or eye closure, ensuring timely alerts. •
Enhanced the system's performance by optimizing the detection algorithm for
minimal false positives and low latency, ensuring reliable operation during
driving.

SKILLS AND ACHIEVEMENTS

Skills DevOps, SQL, Python, C++, Java, HTML/CSS, MATLAB, C Programming Language, MS
World, Excel

Language English (Both), Kannada (Both), Hindi (Both)

Test score NEET (150342)
